

ASSISTANT CROPPING MANAGER

The Australian Food & Agriculture Company requires an Assistant Cropping Manager for the 13,000 hectare dryland cropping operation at "Netherway", situated 40 km NW of Coonamble, NSW.

Working with the Group Cropping Manager and consulting Agronomist, you will be responsible for ensuring that all required operations are planned for and performed in a timely manner and to a satisfactory standard to ensure the success of the cropping program.

This is a hands on role that demands meticulous organization and attention to detail. You will be required to supervise staff and contractors; take responsibility for a significant machinery fleet and its required maintenance; oversee seed, fertilizer and chemical stocks and their application; maintain concise input and production records; and administer WHS requirements.

This is a career opportunity for an experienced broadacre cropping manager or an energetic young person looking to take the next step into a management role. The successful applicant should possess;

- Strong understanding of agronomic requirements for a broadacre minimum till cropping program;
- Experience in machinery based field operations and use of GPS guidance systems;
- Proven ability to calibrate seed, fertilizer and chemical applicators;
- Aptitude for plant and equipment repairs and maintenance;
- Ability to supervise staff and contractors in a team environment; and
- Proficient record keeping skills.

An attractive salary package including family accommodation 40 km from Coonamble and a vehicle for work purposes will be offered.

Applications, including details of prior experience and contact information for three referees, should be directed to:
